

Padlet User Guide

Why would you use Padlet?

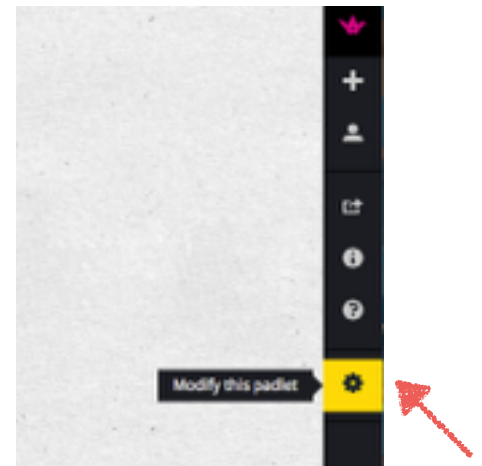

- * to brainstorm ideas with a class
- * to collect and share website links
- * to share assignments and announcements
- * to facilitate class discussions
- * to display student work

How do you use Padlet?

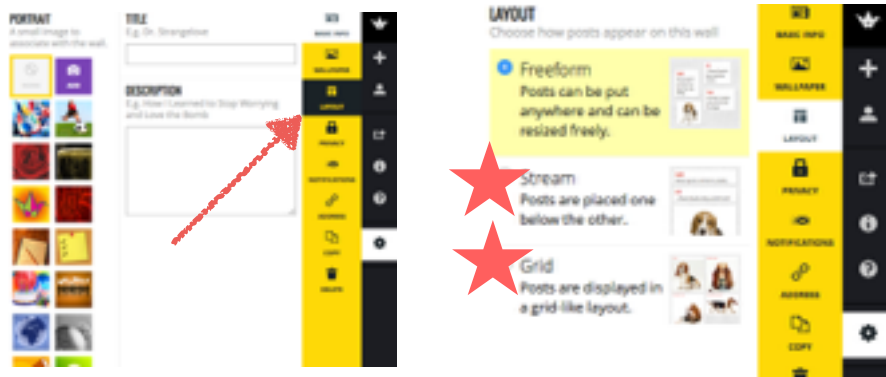

1. Login to Padlet (www.padlet.com) and create a new padlet.

2. Now, you've started your padlet, but you will want to make a few adjustments. On the right side of the screen, choose "modify this padlet."

3. From the "Modify this padlet" menu, you can give your padlet a title, a description, and a portrait icon. You can also change the background wallpaper and the layout. (suggestion: "stream" and "grid" are the best layouts to use with students.)

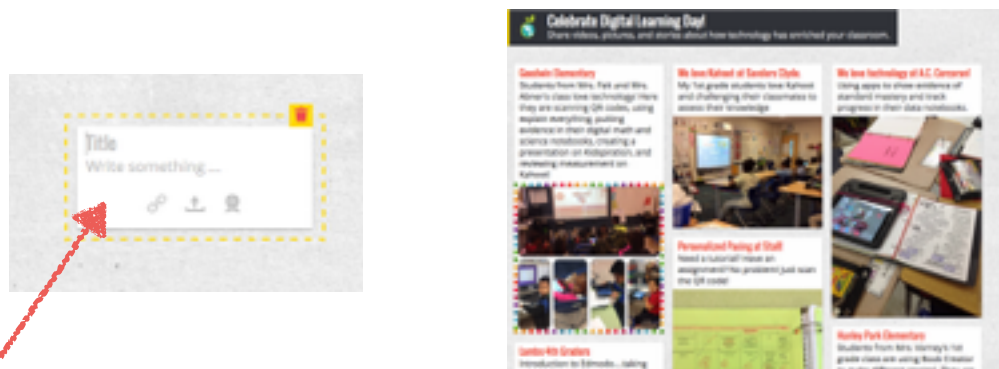

Padlet User Guide

- Once you have your settings complete, it's time to share your padlet! Choose the "share/export" tab in the menu. From there, you can copy the link or QR code for this padlet. (Suggestion: Students can use their iPads to scan the QR code directly from your SmartBoard if you don't want to print it!)

- When you visit your padlet for the first time, it will just be a blank wall. To add something to it, just double click (or double tap) on the background. You can type a message, add a link to a website, or upload a file (like a picture or PDF). Once you post, it saves and publishes automatically. Simple!

Padlet in action!
